### Serverless Computing – Amazon Web Services

A serverless architecture is a way to build and run applications and services without having to manage infrastructure.

Your application still runs on servers, but all the server management is done by AWS. You no longer have to provision, scale, and maintain servers to run your

What makes AWS  
HTTP APIs an important  
tool for Serverless  
architectures? AWS  
HTTP APIs, like API  
Gateway itself, tie  
together discrete Lambda  
Functions and your  
application's API routes.  
This allows you to trigger
